Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

In mathematics, the directional derivative of a multivariate differentiable function along a given vector  $v$  at a given point  $x$  intuitively represents the instantaneous rate of change of the function, moving through  $x$  with a velocity specified by  $v$ . It therefore generalizes the notion of a partial derivative, in which the rate of change is taken along one of the curvilinear coordinate curves ...
