Optics is the branch of physics that studies the behaviour and properties of light, including its interactions with matter and the construction of instruments that use or detect it. Optics usually describes the behaviour of visible, ultraviolet, and infrared light. Because light is an electromagnetic wave, other forms of electromagnetic radiation such as X-rays, microwaves, and radio waves ...

Management models and theories associated with motivation, leadership and change management, and their application to practical situations and problems This section covers:

Management models and theories associated with motivation ...

Job design is the process of Work arrangement (or rearrangement) aimed at reducing or overcoming job dissatisfaction and employee alienation arising from repetitive and mechanistic tasks. Through job design, organizations try to raise productivity levels by offering non-monetary rewards such as greater satisfaction from a sense of personal achievement in meeting the increased challenge and ...

Thales of Miletus, engineer (c. 624-546 BC) First sage of Greece, he founded classical geometry and natural philosophy. Alchemists have claimed him as one of their own. The theorem of Thales (one of two) is about two triangles with parallel sides: The pyramid's shadow is to the pyramid what a man's shadow is to the man []. ...
